MASSAGE

HOW TO RECEIVE A MASSAGE

Take time

Give yourself plenty of time before your massage so you can relax thoroughly in Aquavana's warming environments. Warm muscles benefit most from bodywork.

Shower

A warm shower just before your massage washes off any salts, minerals or chemicals that could clog pores when mixed with massage oils. After your shower, put on your robe and take some time in the relaxation lounge.

(Un)dress the part

Unless the service description specifies that your massage is received clothed, undress completely and wear just a robe to your massage. You will be able to take your robe off and cover yourself in privacy. You will be draped with a sheet throughout the service. For services that are received clothed, shorts and a T-shirt are ideal.

Talk with your therapist

Before your massage begins, tell your therapist which areas you would like to focus on, and any areas to be avoided. During your massage, let the therapist know if you feel any discomfort. Communication is the key to getting the massage you want.

"Deeper" doesn't necessarily mean "better"

Our superb bodywork staff is eclectic, multi-talented and devoted to giving you a massage that will satisfy your needs. Please communicate with your therapist and allow the therapist to "listen" to your body.

Relax

Close your eyes and allow your mind and body to be quiet. Focus on how you feel. Breathe deeply and let tension slip away with each breath. Remember, this time is for you.

Note: We use fragrance-free massage oil; lotion is available upon request.

EXERCISE PHYSIOLOGY

BODY COMPOSITION ANALYSIS

25 minutes

Skin-fold calipers are used to measure the percentage of body fat in relation to lean body mass.

BASIC FITNESS ASSESSMENT

80 minutes

Assess your fitness level through five tests: cardiovascular endurance, muscular strength, muscular endurance, flexibility and body composition. An exercise physiologist will administer the tests and use your results to design a safe and effective exercise program that will help you achieve your goals.

Consult with an exercise physiologist and receive a customized exercise plan to increase your metabolism and reduce excess body fat.

R_x FOR EXERCISE

50 minutes

An exercise physiologist creates a customized exercise program to help achieve your fitness goals, whether you're a novice or an avid exerciser.

PERFORMANCE ORTHOTICS ASSESSMENT

25 minutes

Your feet are subject to enormous forces as you run, hike, dance and play – even just walk – so small abnormalities can cause big problems. This painless, precise, computerized assessment of the way you walk is used to prescribe orthotics – inserts for shoes – that correct these problems simply and effectively.

Note: Cost of orthotic inserts is in addition to service fee. This service is not appropriate for evaluating prescription orthotics that you are already using.

Work with an exercise physiologist to design an efficient exercise program based on your goals, fitness level, preferences and abilities.
