SAKE BY THE GLASS

FLIGHT OF SAKAMAI ~ 20

For thousands of years, rice has been Japan's most important agricultural product. Once a form of currency in Japan, rice is now used to produce many goods, such as flour, vinegar, mochi, and of course, sake. Each type of sake rice will behave a bit differently during the brewing process, this combined with the water of the region will have an amazing impact on the flavor of the sake.

These 3 sakes clearly reflect the type of rice they have been brewed with, and are all Junmai (pure rice) sakes that will pair amazingly with our celebration of 3 cultures- Japanese, Brazilian and Peruvian
